

CUSTOMER SUCCESS STORY

MOVES AI WORKLOADS FROM DEDICATED SERVERS TO COLOCATION

Taking control of data, security and infrastructure.

CyberGhost migrated its AI processing and data workloads from third-party dedicated servers to Freedomtech colocation to ensure complete data sovereignty, enhanced security, and full infrastructure ownership.

YOUR DATA.
YOUR AI.
YOUR FUTURE.

BEFORE: DEDICATED SERVERS

- ❌ Data hosted outside their control
- ❌ Limited visibility into infrastructure
- ❌ Complex vendor management
- ❌ Higher costs with hidden charges
- ❌ Compliance and sovereignty challenges
- ❌ Scaling was slow and inflexible

AFTER: FREEDOMTECH COLOCATION

- ✅ 100% data sovereignty and ownership
- ✅ Full control over hardware and environment
- ✅ Single partner for infrastructure and support
- ✅ Predictable costs with no hidden fees
- ✅ Meets GDPR and global compliance standards
- ✅ Rapid scalability across 21 global locations

KEY BENEFITS ACHIEVED

DATA SOVEREIGNTY
All data stays within controlled, compliant environments.

ENHANCED SECURITY
Private infrastructure with advanced physical and network security.

FULL OWNERSHIP
Complete control over hardware, configurations and data.

COST TRANSPARENCY
Predictable pricing, no hidden charges, better ROI.

GLOBAL REACH
Deploy and scale seamlessly across 21 data centres.
